

ELECTRIC HEIGHT & WIDTH PARALLEL BARS

MODEL 1357

Model 1357
Electric Height & Width Parallel Bars

Patent pending Electric Parallel Bars offer the best in innovation. The state of the art design articulates while lowering the bars to assist a patient standing from a wheelchair. The large range of adjustability makes the bars useful for both adult and pediatric patients for a variety of activities including walking, gait training, side stepping and sit to stand activities. The battery power eliminates the need for floor outlets or placement near a wall and eliminates trip hazards seen with corded products.

- Individual digital controls for both height and width adjustment
- Battery powered
- Overhangs platform by 12" for wheelchair assistance.
- 600 lb weight capacity, 300 lb each side
- Easy grip 2" bars
- Includes extra battery and charging cradle
- 3mm platform edge for durability
